RIVERTON UT 84065

Dear Mr. Dunlop:

On November 22, 2000, you met on site with Larry Garahana of my staff, and Tom Munson, Senior Reclamation Specialist, for the Division of Oil, Gas and Mining (DOGM), in regards to your notice level mining operation located in the SE $\frac{1}{4}$ of Section 35, Township 12 South, Range 7 West. Said operation was inspected by my staff on November 14, 2000, and at that time the disturbance was calculated by the use of a Global Positioning System (GPS) to be at 6.60 acres, which is larger than the five acre limit allowed by your Notice of Intent that our office accepted on March 15, 2000.

At the November 22nd meeting, it was determined, and agreed upon by you that Resource Design Solution (RDS) would reclaim a portion of the existing disturbance to bring your operation under the five (5) acre limit until the time that a large mining plan could be approved. The area in question was agreed to be reclaimed and seeded before the end of this calendar year (December 31, 2000). A reclamation plan was discussed with you at the time of the meeting, and once the earthwork is complete, a field inspection should be arranged with my staff before the seed is applied.

The attached map shows the area of disturbance that RDS is responsible for, along with the agreed area to be reclaimed.

Also attached is a seed list conducive for this area, with instructions on applying said seed.

If you have any questions, please feel free to contact Larry Garahana at (435)743-3126.

Sincerely,

A handwritten signature in cursive script, appearing to read "Rex Rowley".

Rex Rowley
Field Manager

SEED MIX FOR DESERT MOUNTAIN AREA

Hycrest Crested Wheatgrass	<u>Agropyron desertorum</u>	<u>Lbs/acre</u> 3
Pubescent Wheatgrass	<u>Agropyron trichophorum</u>	2
Russian Wildrye	<u>Elymus junceus</u>	2
Ladak Alfalfa	<u>Medicago sativa</u>	1
yellow Sweetclover	<u>Melilotus officinales</u>	$\frac{1}{2}$
Total =		$8\frac{1}{2}$

The BLM requires pure live seed to be purchased for the rehabilitation of federal land and may request a copy of the seed tag and purchase receipt for our files. The seed weights given are for drilling. The seed should be drilled to a depth of one half inch. If it is not possible to drill the seed, then the seed can be broadcast. If the seed is broadcast, the application rate should be doubled. After broadcasting, the land should be lightly harrowed to bed the seed.
